## PREPARATION, IMPORTANT!!
Please check and make it sure before you use the Photoshop Action

1. Make sure you are running the **English version of Photoshop**.
   If you are not using the English version of Photoshop,
   you can always change it to English and then back again
   to your native language using this step below.

   Tutorial video: *https://www.youtube.com/watch?v=GJAiu5W2gLE*

   Or for instructions on changing your Photoshop language with
   Creative Cloud, please visit
   ----
   https://helpx.adobe.com/creative-cloud/help/change-install-language.html
   --
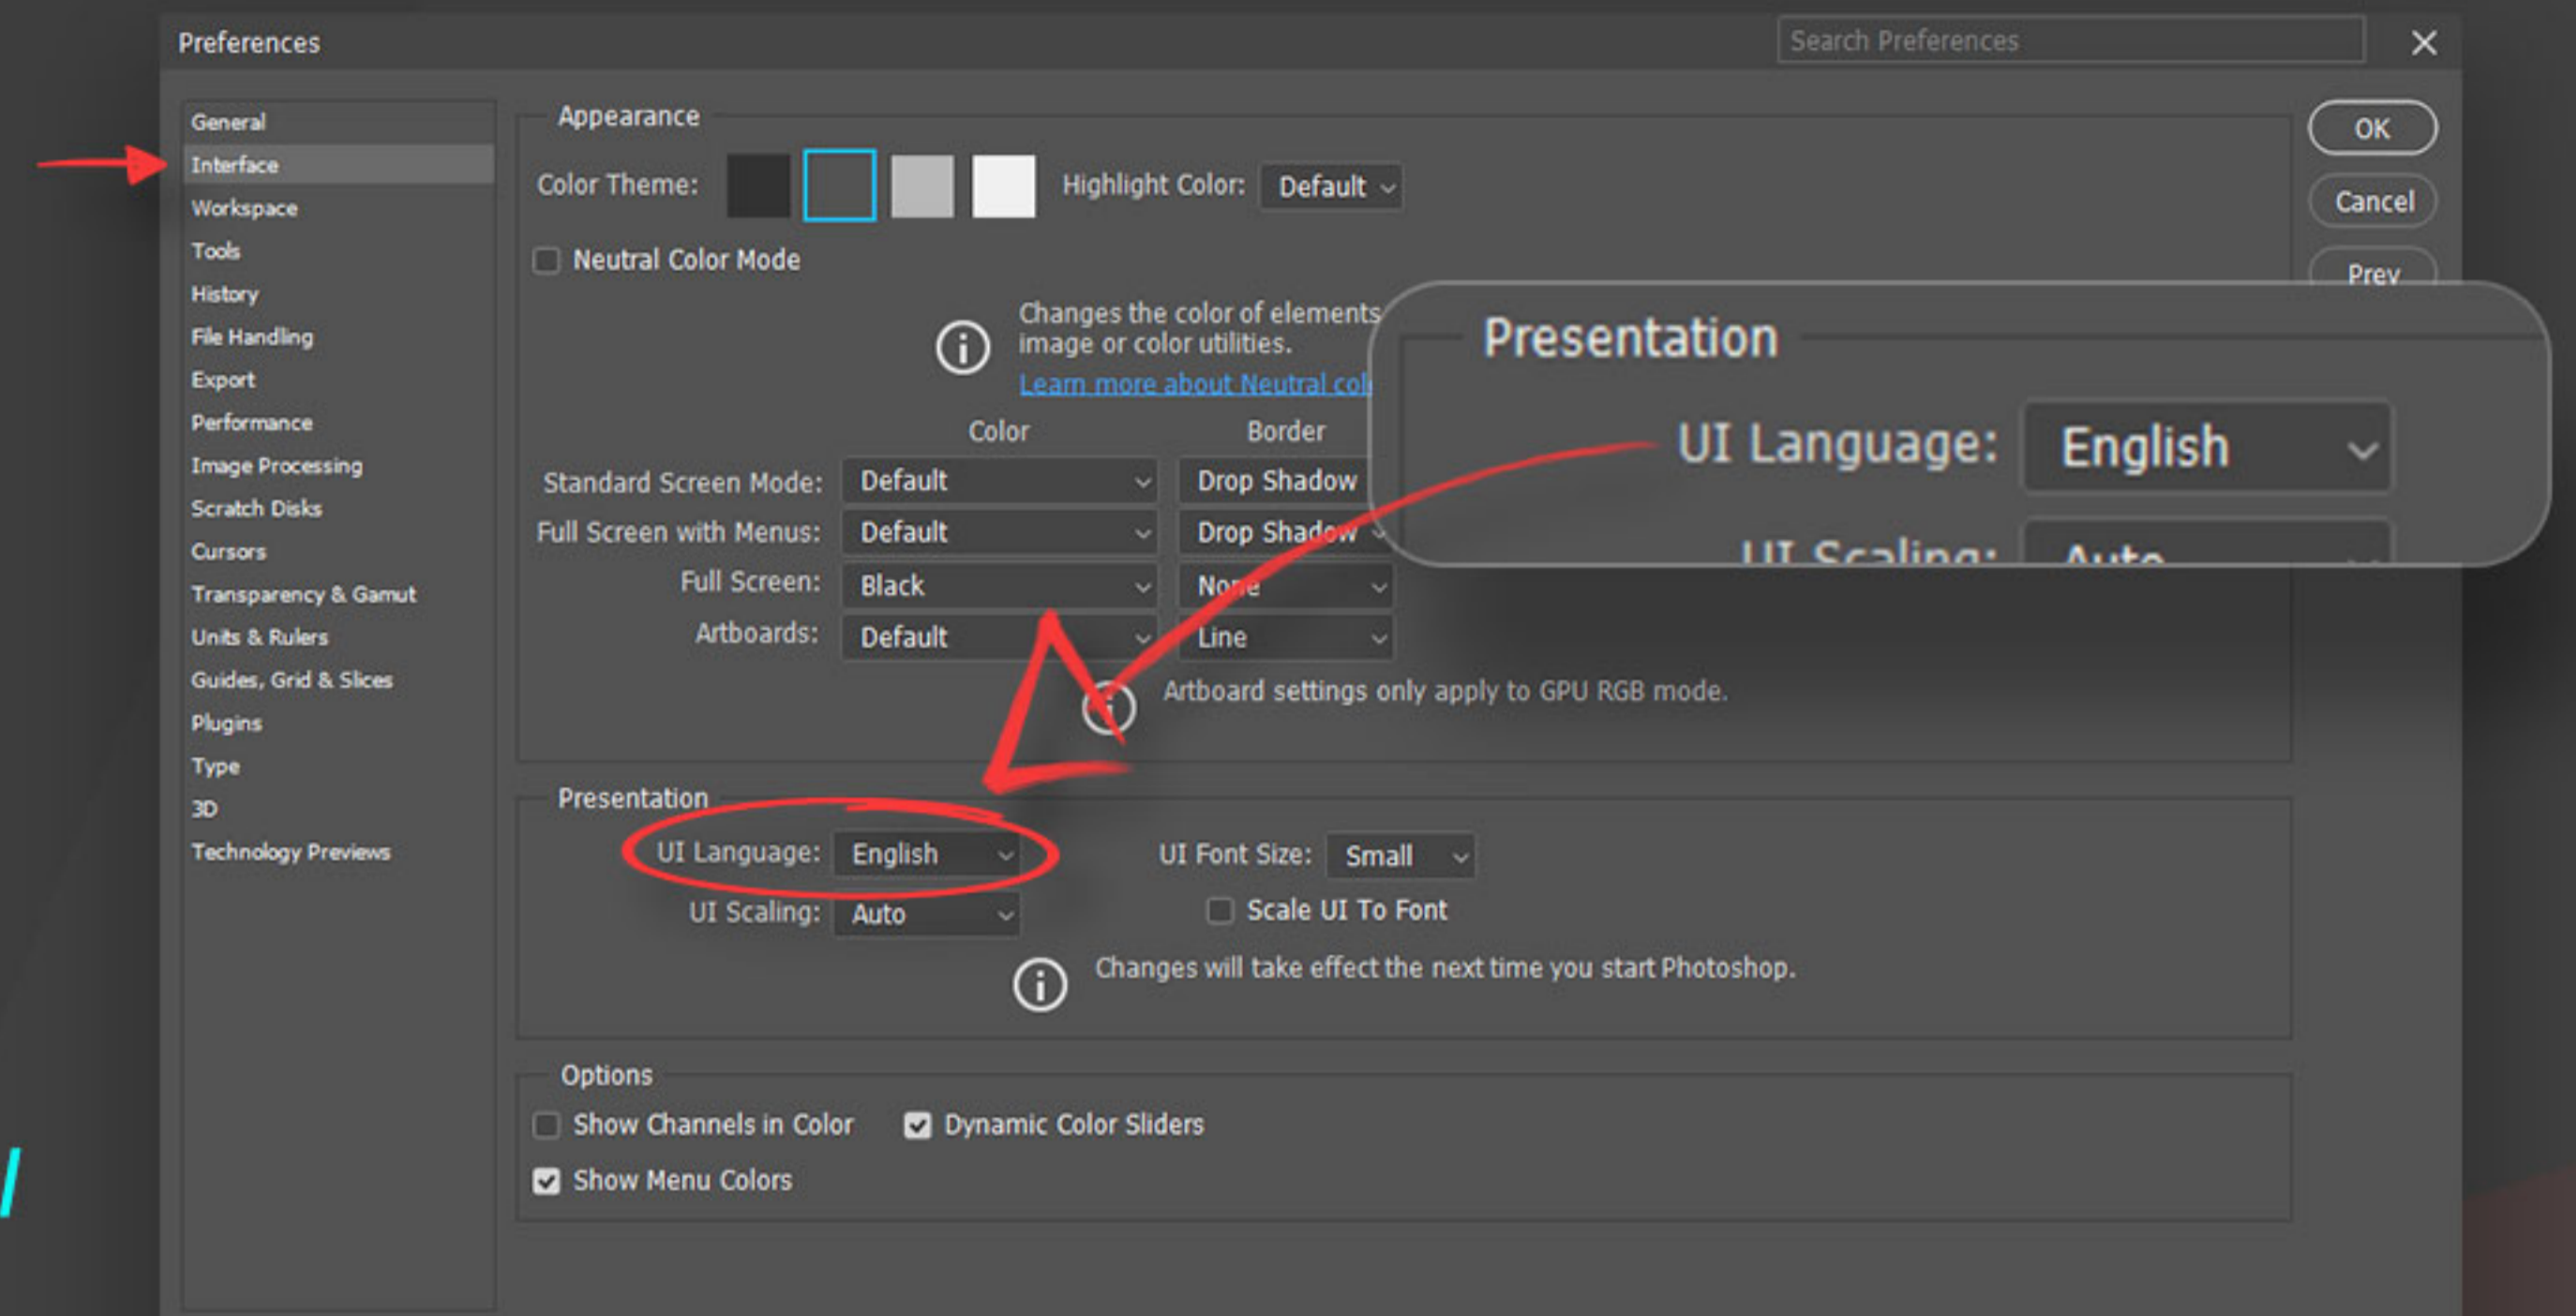

2. Your photo/image is must be in **RGB** color mode and **8bit** color mode
   to check and set RGB Color and 8bit color go to menu
   "Image -> Mode -> RGB Color"
   "Image -> Mode -> 8 Bits/Channel"
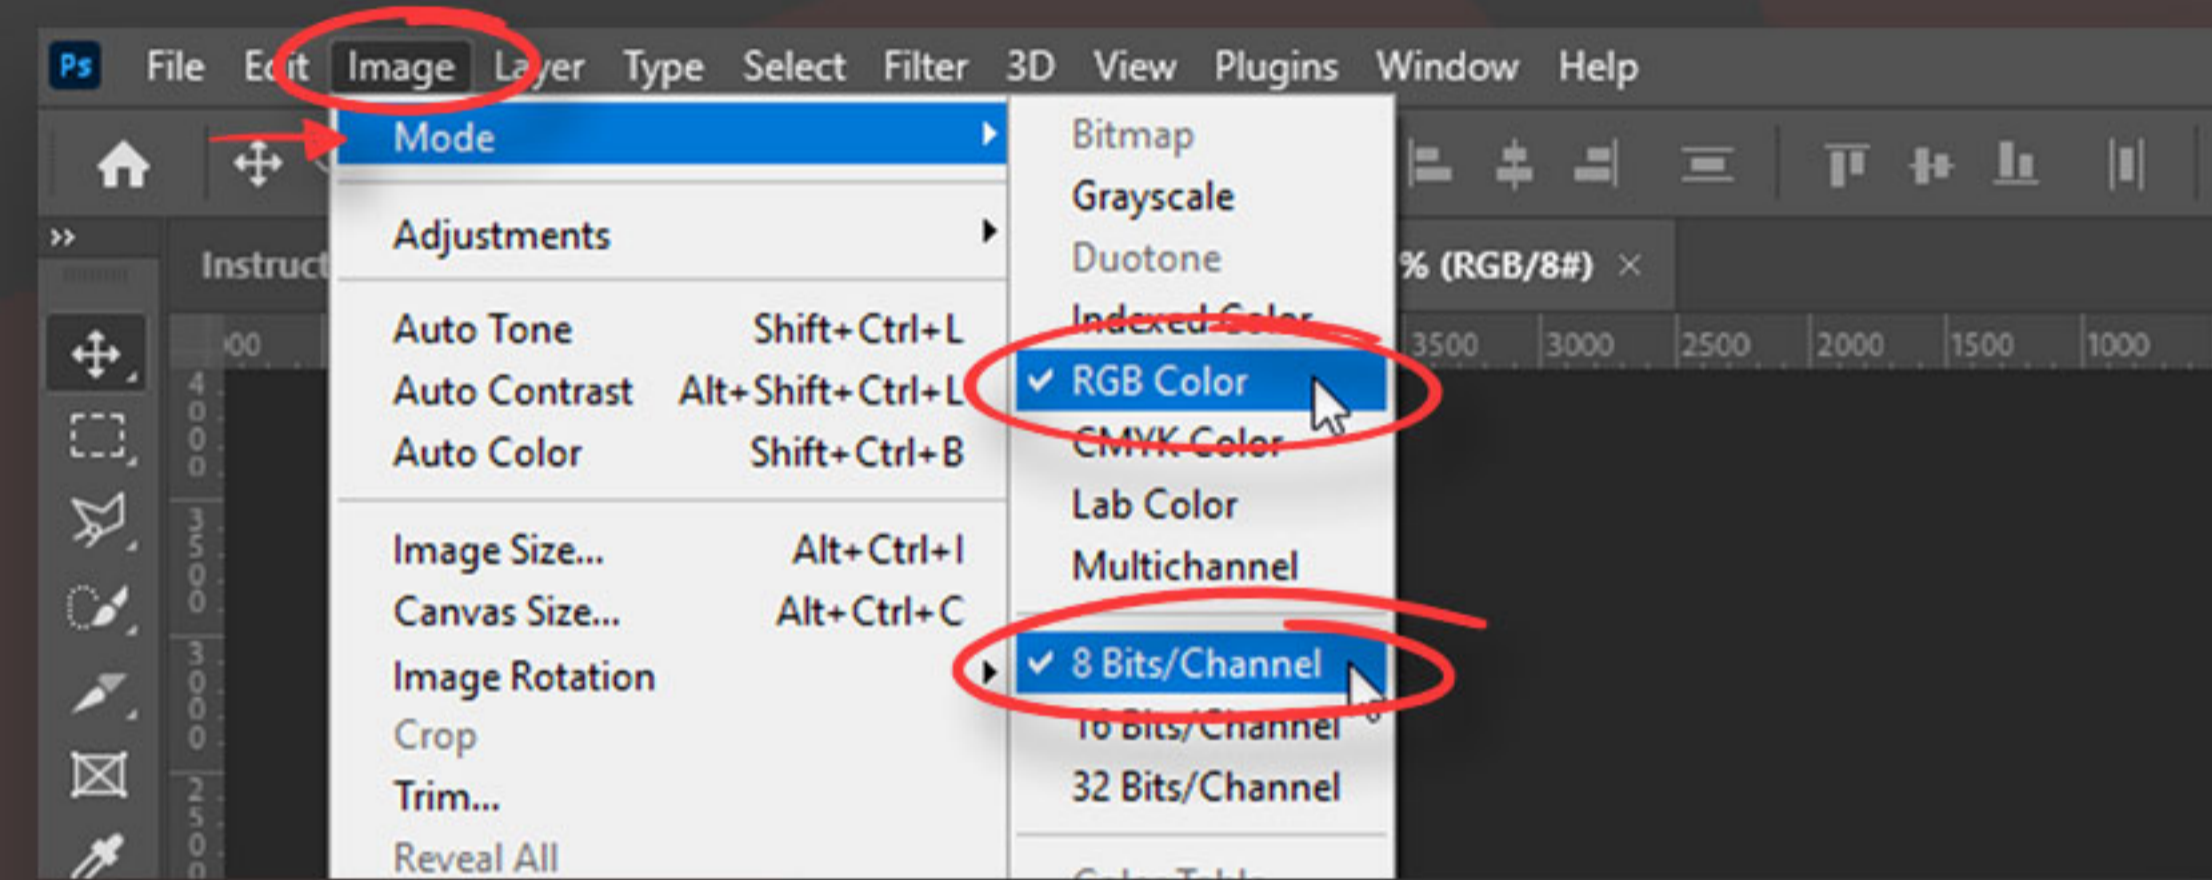

3. Make sure that the **image's layer** is **locked** 🔒 and it's set as '**Background**'.
   to set a layer as Background go to menu:
   in the layer box, select the layer that you want to make as locked background,
   then select the menu tab *"Layer -> New -> Layer from Background"*
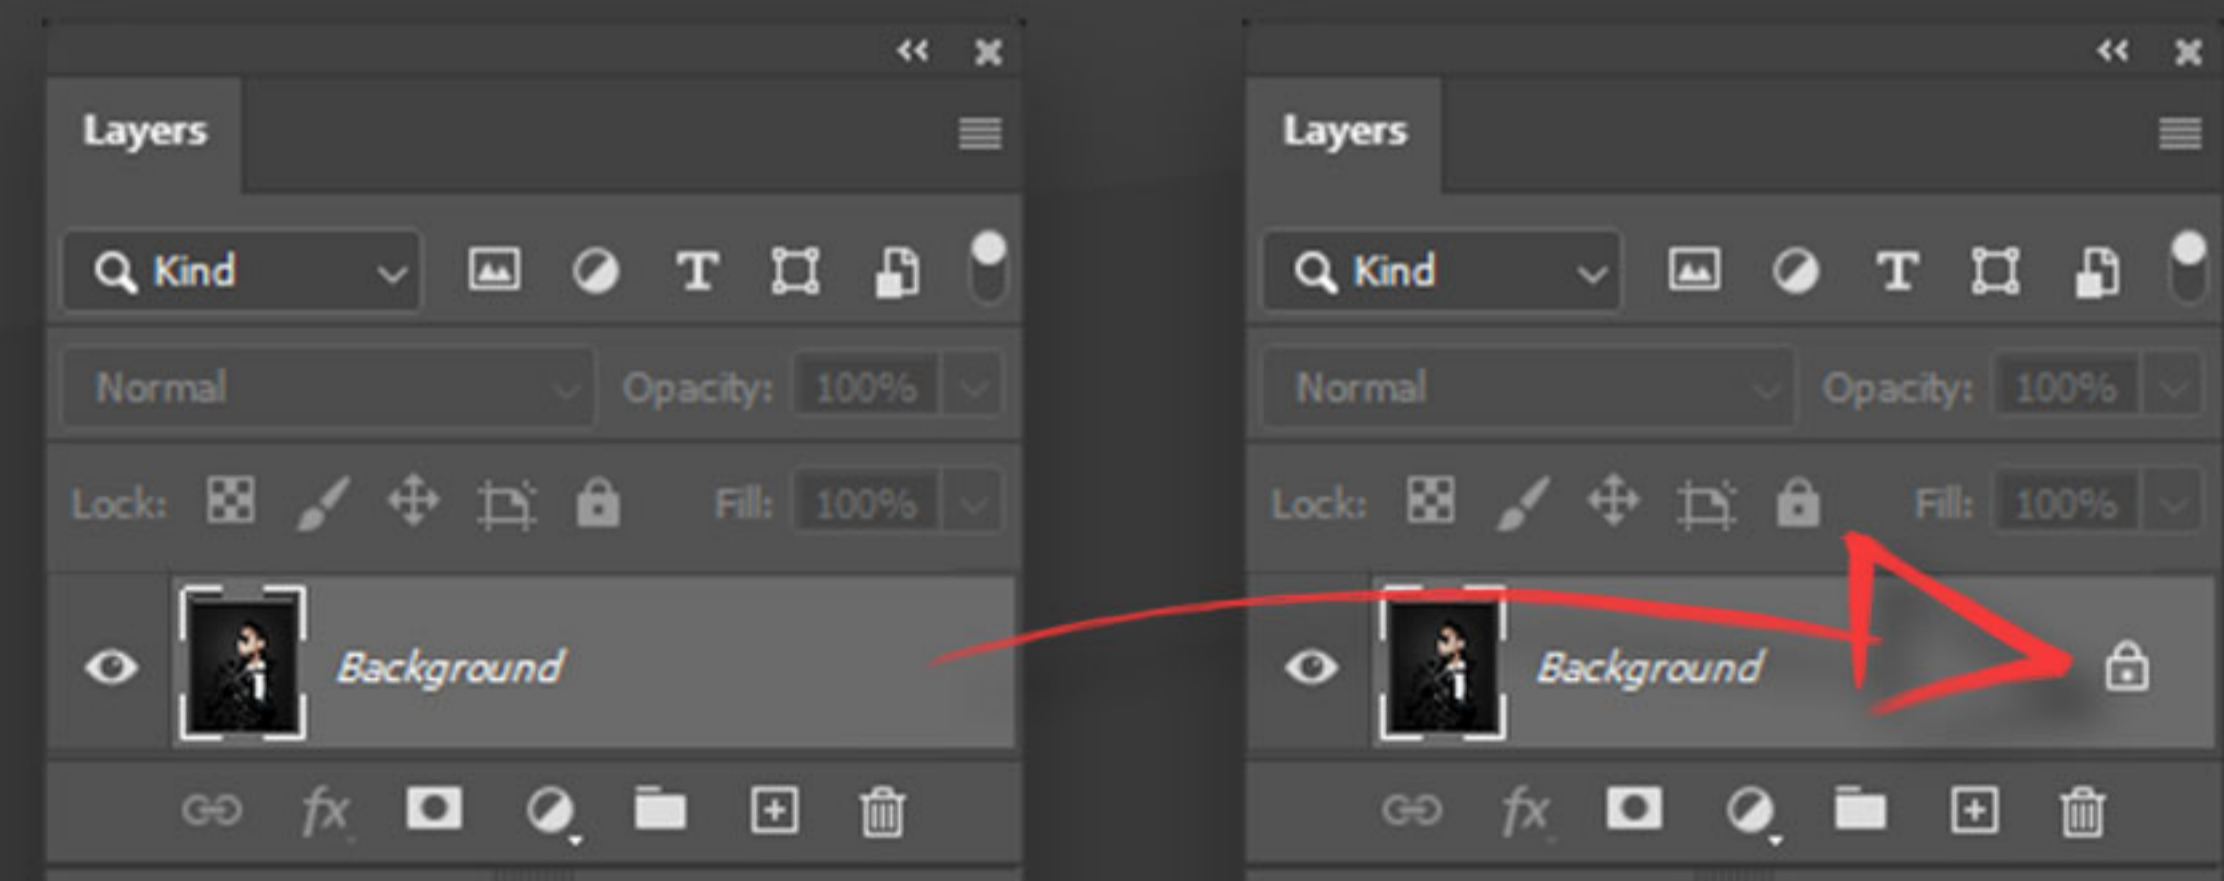

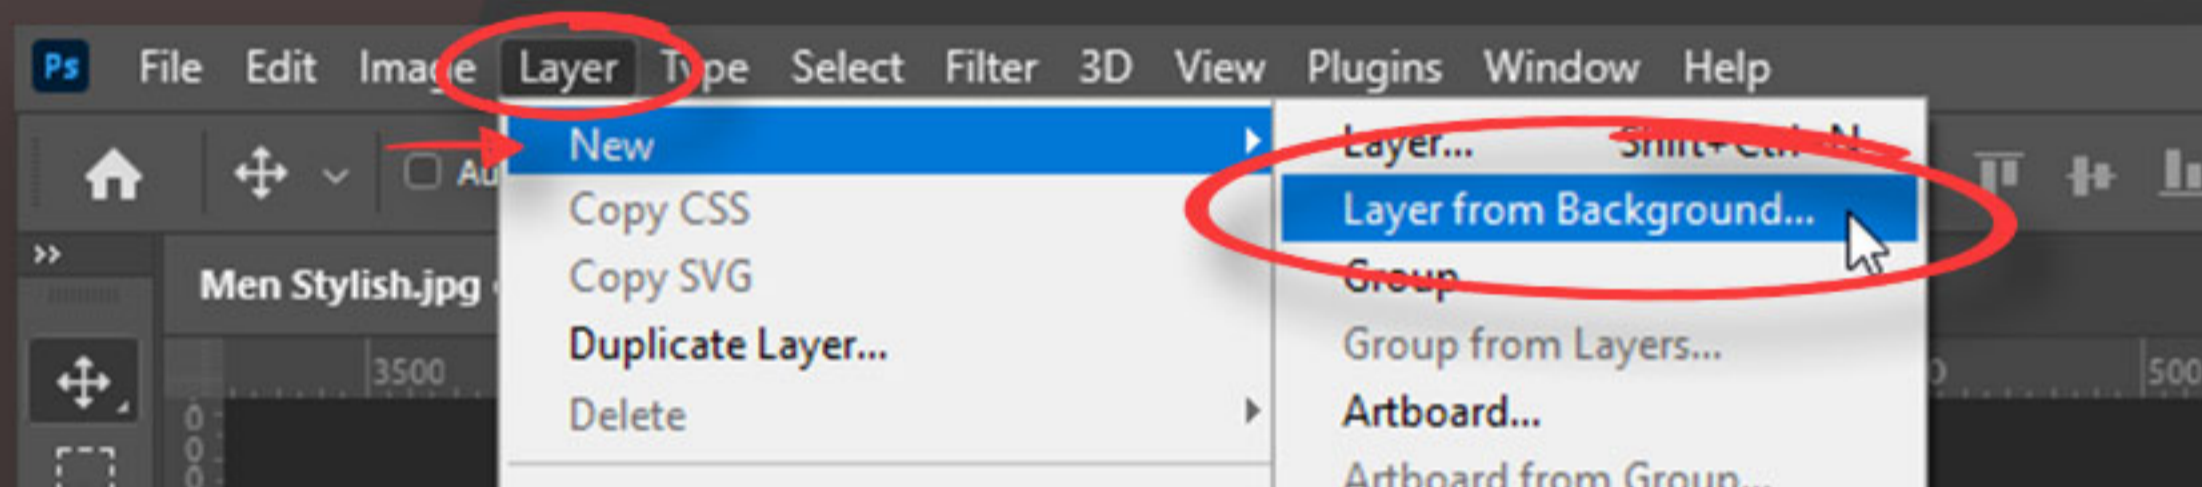

4. Click on menu icon at the right on *"Layers"* box panel and go to *"Panel Options"*,
   and then check the *"Add "copy" to Copied Layers and Groups"*
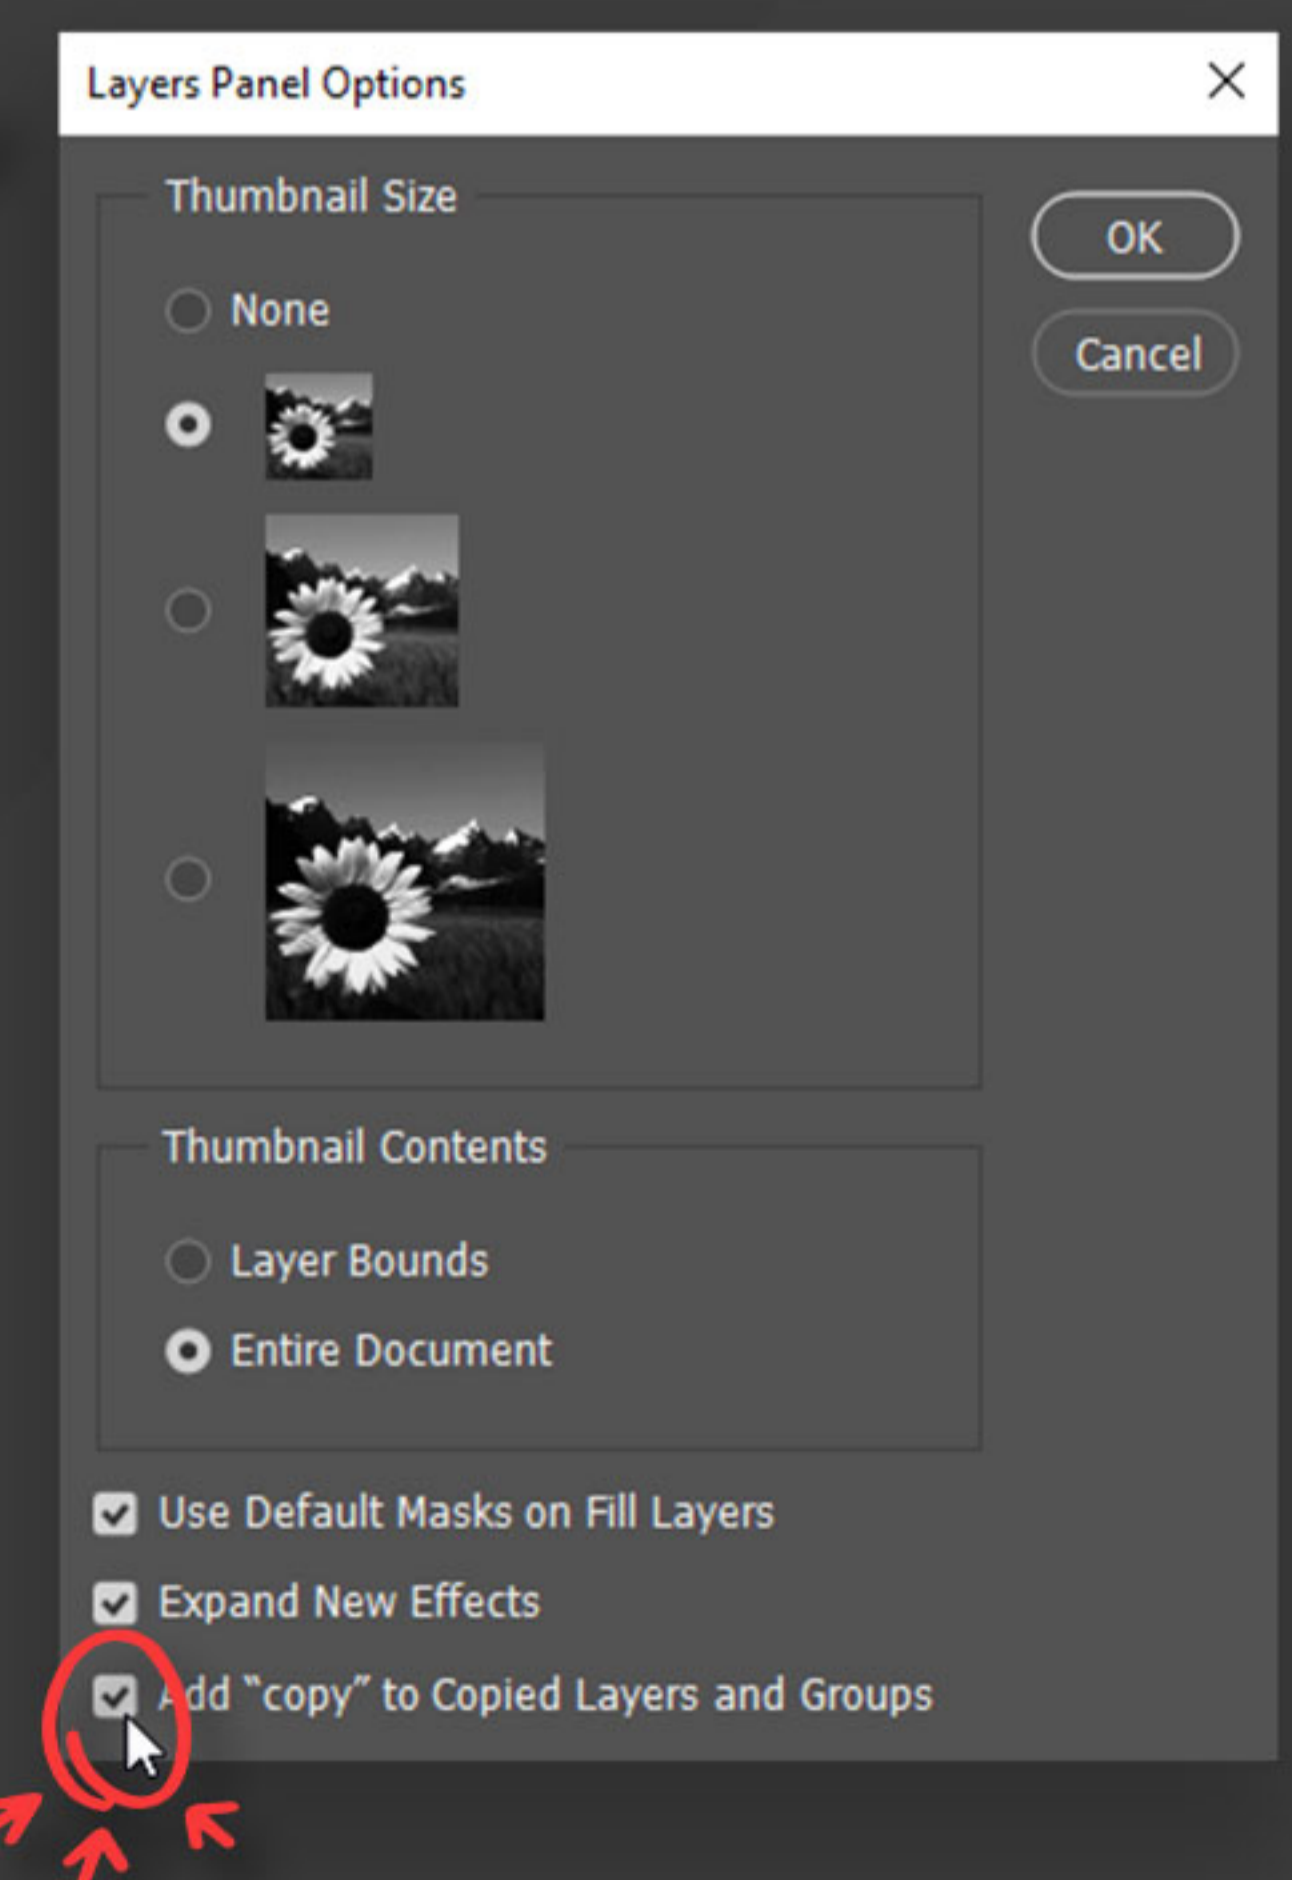

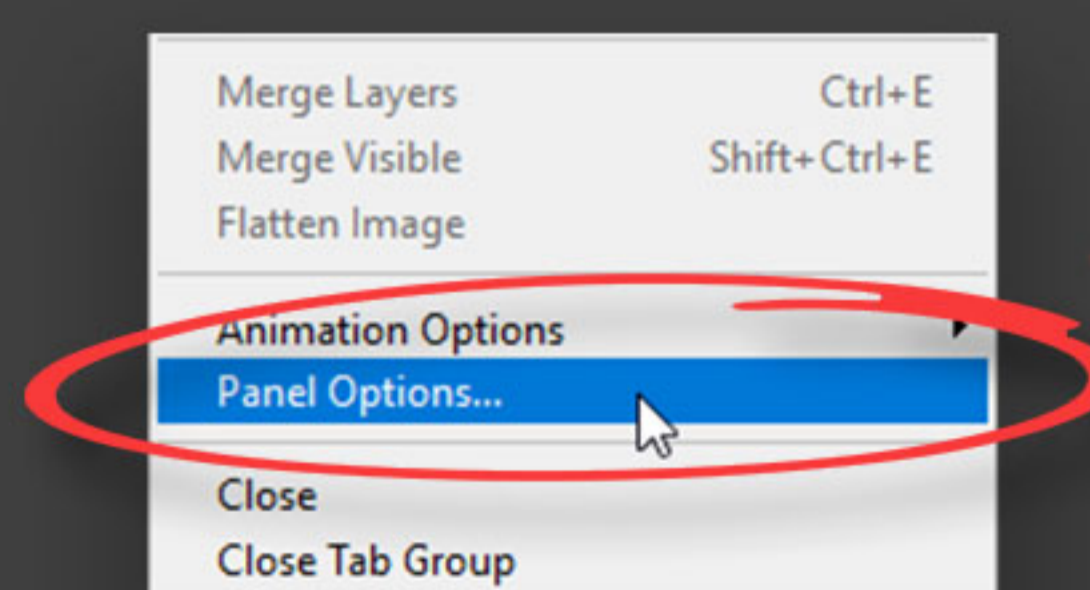

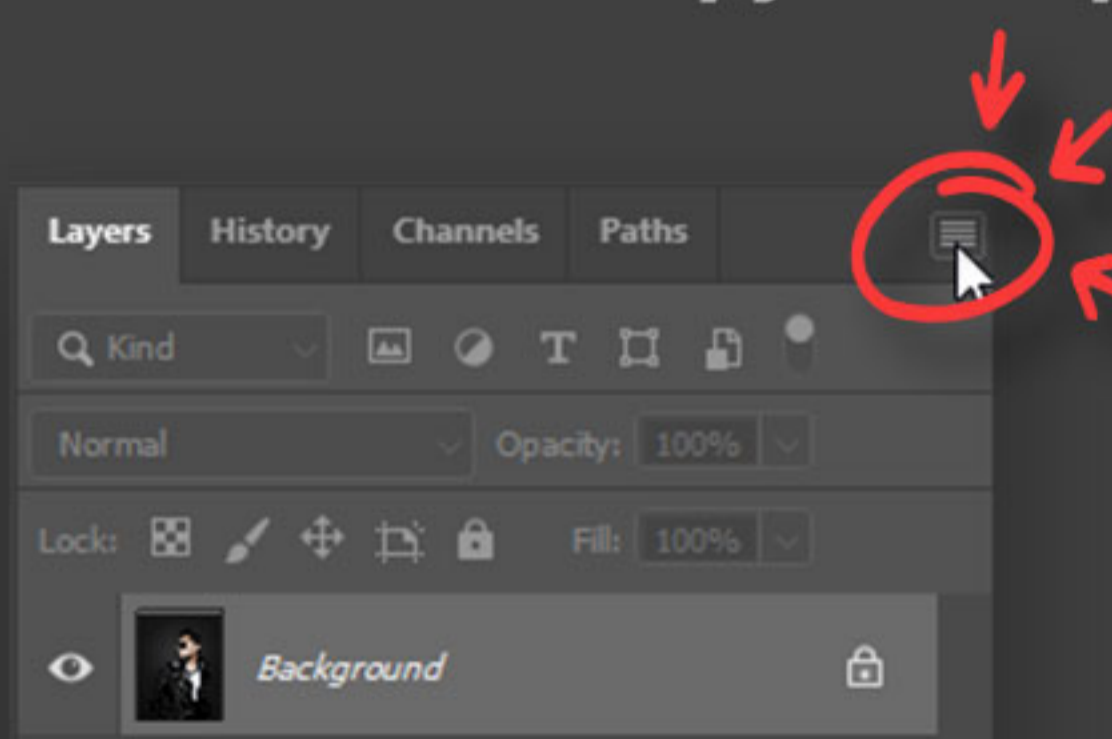

5. Avoid using small or too large image resolution.
   For the best results, please refer to the instructions for setting up
   the use of stock images in "**IMAGE USAGE SETTINGS.jpg**".

You can see how to do the preparation on the video:
*Preparation https://youtu.be/PChNKRsoYEM*

HOW TO USE THE ACTION
Please follow the instruction below

1. Import patterns and actions
   Select *"File -> Open -> Choose a pattern and action you want to import"*

   Tutorial Video: *https://youtu.be/ecRcAXJPlpI*

2. Check the availability of patterns and actions that have been imported
   Pattern: Select *"Window -> Patterns -> In the Patterns box check the availability of the Pattern you just imported"*
   Action: Select *"Window -> Actions -> In the Actions box check the availability of the Action you just imported"*

   Tutorial Video:
   Patterns Ps CC 2015.5 & higher: *https://youtu.be/cw5a29mIK0E*
   Actions Ps CC 2015.5 & higher: *https://youtu.be/aMv_OtEdLyw*
   Ps CC 2020 and higher: *https://youtu.be/ecRcAXJPlpI*
   --
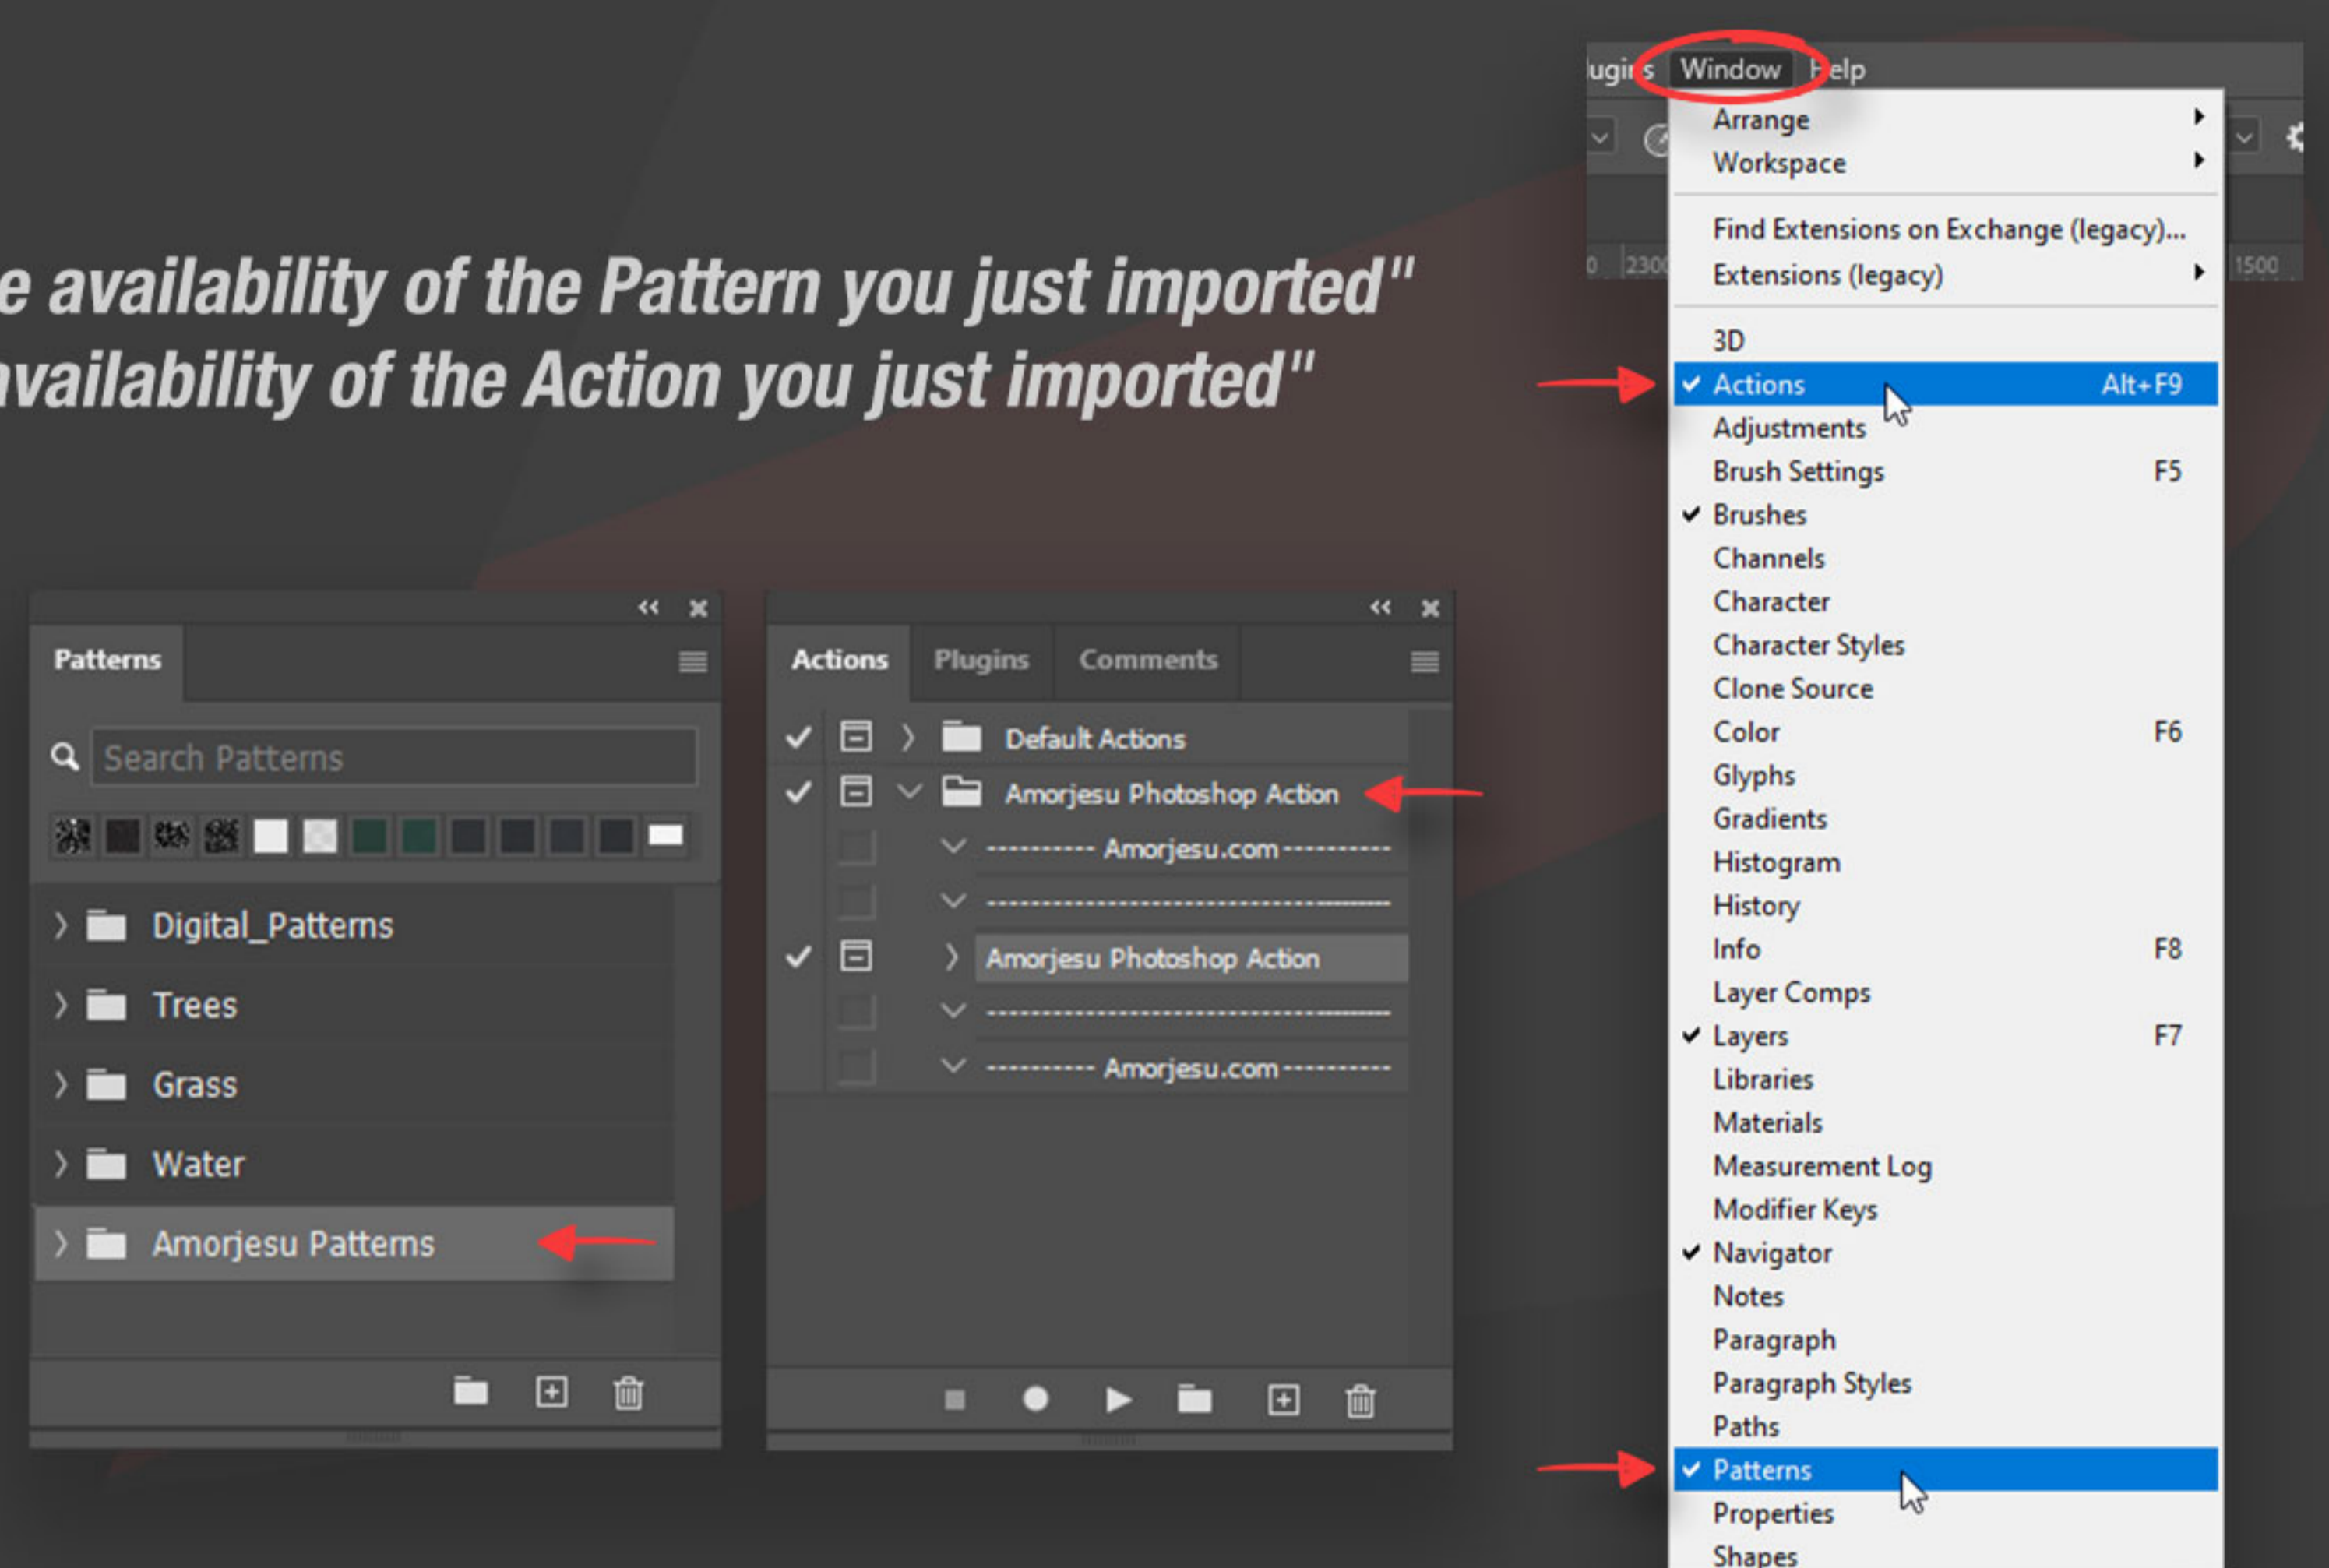

3. Open Image, Making Brush Layer & Play Action
   a. Open your image/photo:
   Select *"File -> Open -> Choose a Image/photo you want to use"*.

Tutorial Video: Open Image - Making Brush Layer - Play Action
https://youtu.be/MpFrx-NNv8U

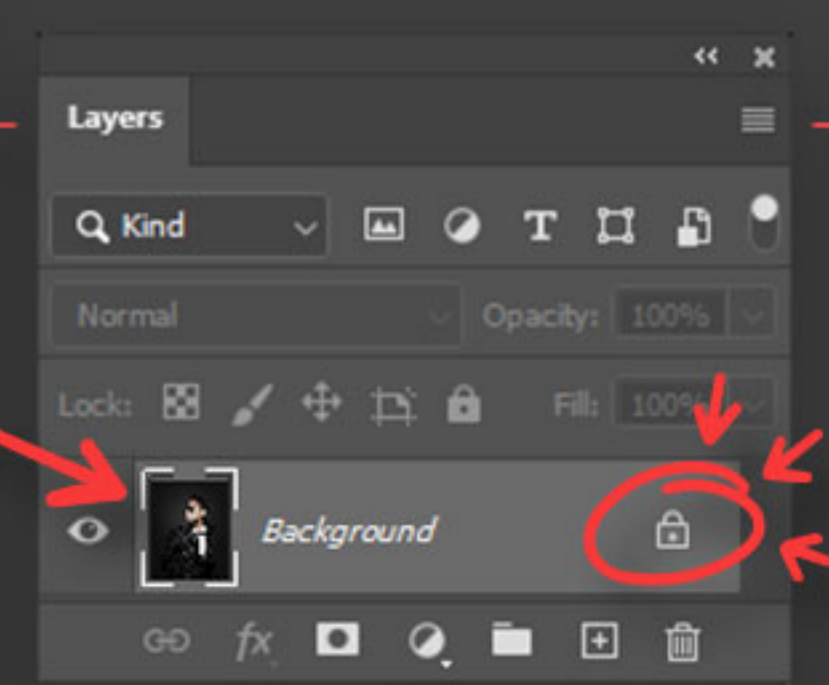

IMPORTANT!!
Before playing the action select the Brush tool and make sure that
"**Opacity**" and "**Flow**" of the brush is set to **100%**.
Also make sure that the **Airbrush** mode is set to **OFF**.
At last make sure to have only two layers
on your layers box "**aj**" and "**Background**".
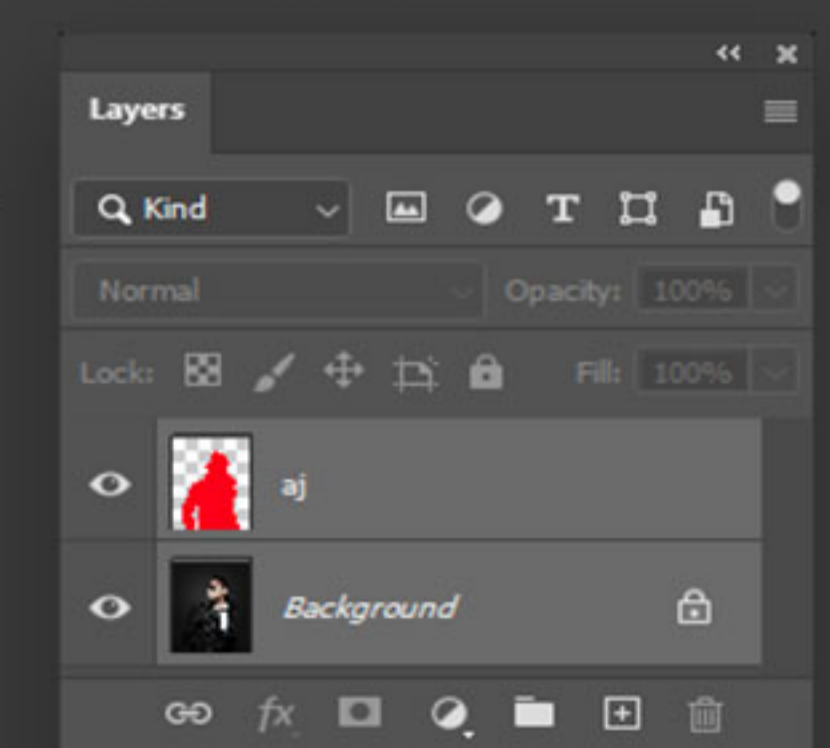

Make sure the image layer is **locked** 🔒
and it's set as '**Background**'
(see: page 1 "**PREPARATION,
IMPORTANT!!**" point 3).

b. Create a new layer and name it "**aj**" (must be lowercase).
   Brush on this layer the main object area (you can use any color).

HOW TO USE THE ACTION
Please follow the instruction below

c. In the Actions box select the action you want to use
then **press** the "**Play**" button.

5. Wait a few seconds until the program finishes work
(speed of action work depends of the power of your computer).

6. After the Photoshop action is complete, you can make design
adjustments in the "**Layers**" box (if you need).
Please refer to the instructions for setting the final design and
optimization in "**OPTIMIZE DESIGN.jpg**".

7. And after all the process is completed, and the design you feel ready,
please save your design.

TROUBLESHOOTING

If the action does not work properly or fails to run it is usually due to several things:
- use of different photoshop versions   - often install or load plugins, action, brush, pattern
- there have been several different settings   - or it could be because of other problems
try some of the ways below to solve your problem:

1. Check and change photoshop version
how to check and change the photoshop version
you can see on the video

Tutorial video: *https://www.youtube.com/watch?v=GJAiu5W2gLE*
----

2. Reset Photoshop
This is the most powerful way to solve problems
that often occur in Photoshop.
How to reset photoshop you can see on video

Tutorial Video: How To Reset Photoshop *https://youtu.be/hUA9mH8LimU*

After you reset photoshop, you can re-use it as usual

3. Please visit our troubleshooting page at the link below to get
complete answers about the problem you are facing.
