This documentation presents information of the product mentoined above.

About the product

This Mockup allows you to perspectify your website in different isometric perspectives. Wether you just need one page or more pages, you might change the numbers of views in your template. It cointains pre-made mockups created with Adobe Photoshop. Create your presentation within second and edit the files with smart objects. These modern and professional showcases will give you the opportunity for a better presentation of your works. Feel free to add any product, image, template or graphic into the mockup to present your work.

How to use

1. Open the .psd file inside Photoshop (minimum version required: CS1)
2. On the Layers palette locate the smart layers named "front" to replace the image of the choosen mockup. Double click on layer thumbnail to open the smart object container (.psb file)

3. Inside the .psb file, hide or delete the placeholder design then drop your own work in place.
4. Close the .psb file and save it. Enjoy your presentation!
