HOW TO USE INFO:

1. Download all the fonts and install them

Open the links above in your browser and download the fonts. Double click each font file and install fonts on your computer before opening our photoshop files. If you've already opened photoshop files, but missing the fonts, just close the photoshop and install the fonts.

2. Edit photoshop files - editing images

Open the photoshop file you wish to use and change the text and images. Double click layers titled PLACE YOUR IMAGE HERE and just drag your image in the photoshop. Resize it and position as you want and save the file.

3. Working with smart objects

All image files and all vector graphic / hand drawn elements can be easily replaced and updated via Smart Object. In order to edit these you need to double click the layer thumbnail and the new window will be opened.

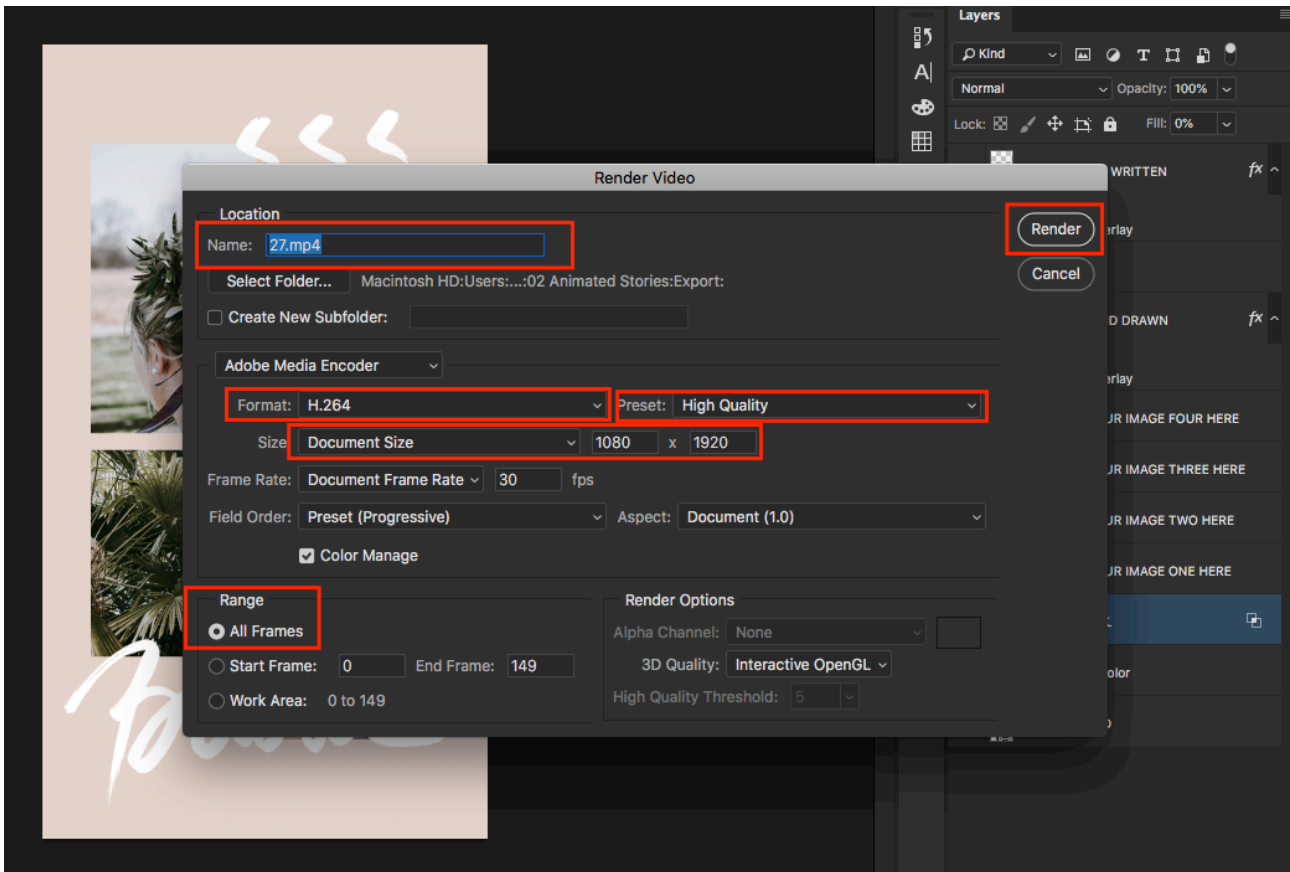

In the new window simply delete the graphic that is already there and drag new-hand drawn item or image. Save the file and go back to your original file.

4. Save your files

If you want to save your stories, just click on **File > Export > Save for web** and save a story as JPG or PNG file.

If you'd like to save the stories as animated videos just click on **File > Export > Render Video** and save the video as MP4 file as shown on the image below:

5. Transfer your videos or static stories to your phone and publish them on Instagram.
